Education

2015–2019 Mathematics Track, Lyceum for Gifted Children, Saransk, Russia

2019–2023 **Bachelor's Degree in Information Systems and Technologies**, *ETU "LETI"*, Saint Petersburg, Russia

Skills

Programming languages: C/C++, Python, Java, SQL

Technologies: MapReduce, Spark, Kafka

Work experience

August 2021 – December 2022 **Quantitative Engineer.** Itiviti Group / Broadridge. Volatility Manager Team.

- Designed and developed infrastructure for automated plug-in testing on an algorithmic trading platform, improved system performance, conducted benchmarks and log analysis, and resolved software bugs.

July 2023 – September 2026 **Software Engineer.** Yandex Ads/Human Identification Team.

- Designed and implemented a real-time data delivery service for the identification engine, establishing a unified pipeline for real-time data ingestion. Reduced data delivery latency from 2 hours to a few minutes.
- Performed low-level optimization of high-throughput CSV-like log parsing, achieving a 10× speedup and reducing total CPU usage by 12%.
- Developed a model for estimating advertising campaign reach. Improved accuracy, reducing the average estimation error from 10–50× to within 30% of the actual value.
- Optimized large-scale MapReduce/SQL graph processing, reducing processing time from 55 to 22 hours (60%).
- Conducted data analysis and investigations to identify and resolve issues in a large-scale logic-intensive data processing system.

Achievements & Awards

2016 First-degree diploma, Russian National Olympiad in Programming, Regional Stage

2016 Second-degree diploma, Russian National Olympiad in Mathematics, Regional Stage

2018 Finalist, Technocup Programming Olympiad
